
Report Monitor

Complete Technical & Admin Guide

National Institute of Electronics & Information Technology
Bhubaneswar

Document covers: access control, linked pages, database tables, data flow,
report sections, filters, and production URLs.

1. Overview

Report Monitor is a read-only analytics dashboard for Master Admin. It combines statistics from courses, student registrations, batches, training centres, and faculty assignments in one place. It does not create, edit, or delete any records.

Production URLs

- https://nielitbhubaneswar.in/admin/report_monitor
- https://nielitbhubaneswar.in/admin/report_monitor.php
- Local (XAMPP): http://localhost/public_html/admin/report_monitor

Purpose

- Monitor total applications, pending approvals, and batch enrollments
- View centre-wise and category-wise breakdowns
- Track monthly batch and application trends (charts)
- Review faculty training assignments across batches
- Inspect batch fill rates and coordinator details

2. Access Control

Role	Access
master_admin	Full access — only role that can open Report Monitor
course_coordinator	Denied — redirected to dashboard with error message
front_office_desk	Denied
nsqf_course_manager	Denied
placement_coordinator	Denied

Access flow:

- Not logged in ? redirect to [admin/login.php](#)
- Logged in but not master_admin ? redirect to [admin/dashboard.php](#) with "Access denied" message
- master_admin ? page loads normally

3. File Structure

File / Path	Description
admin/report_monitor.php	Main UI page: filters, KPI cards, charts, tables
includes/report_monitor_helper.php	All SQL queries and data aggregation logic
includes/course_category_options.php	Course category definitions (included by helper)
admin/includes/sidebar.php	Navigation link (Master Admin menu block only)
config/config.php	Database connection, APP_URL, session
includes/theme_loader.php	Admin theme and branding CSS
assets/css/admin-theme.css	Shared admin styling

Important: [report_monitor_helper.php](#) is only used by Report Monitor. No other admin page includes it.

4. Navigation & Linked Pages

Pages that link TO Report Monitor

Source	Link
Admin Sidebar	app_url('admin/report_monitor') — visible only to Master Admin
Reset button on page	report_monitor.php — clears all filters

Pages linked FROM Report Monitor (outbound only)

Button on page	Destination
Manage Batches	batch_module/admin/manage_batches.php
Manage Faculty in Batches	batch_module/admin/manage_batches.php

Report Monitor does NOT link directly to: Students list, Courses management, Registration form, or public website pages. Data from those modules is read via the database only.

Related admin modules (data sources, not direct links)

Admin module	Path	Feeds Report Monitor
Student registrations	student/register.php	students table rows
Students admin	admin/students.php	Status, batch assignment
Courses	admin/manage_courses.php	courses table
Batch module	batch_module/admin/manage_batches.php	batches, batch_students
Faculty	admin/manage_faculty.php	faculty, batch_faculty
Centres	admin/manage_centres.php	centres table

5. Database Tables Used

Report Monitor READS from these tables (never writes):

Table	Used for
courses	Course count, category grouping, centre/training_center, course names
students	Applications, pending count, active/approved count, batch assignment flag
batches	Batch count, monthly trends, batch details table, fill rate
batch_students	Students enrolled in batches (if table exists)
centres	Centre dropdown filter and centre-wise statistics
faculty	Faculty training report — names, designation, department
batch_faculty	Links faculty to batches for training report
admin_course_assignments	Helper function exists for scoped courses (page uses all courses by default)

Student counting rules

- INCLUDED statuses: pending, active, approved (and similar non-terminal statuses)
- EXCLUDED statuses: rejected, inactive
- Student "in batch" = students.batch_id is set OR row exists in batch_students for that record
- Rejected applications do NOT appear in application totals

6. Report Sections & Data Functions

UI Section	PHP Function	Shows
KPI cards (top)	report_monitor_get_overall_stats()	Total applications pending, to
Monthly trend chart	report_monitor_get_batch_monthly()	New batches enrollments month
Centre chart	report_monitor_get_centre_stats()	Applied vs centre
Category chart	report_monitor_get_category_stats()	Applications category gr
Centre-wise table	report_monitor_get_centre_stats()	Courses, b applications unassigned
Faculty training report	report_monitor_get_faculty_stats()	Faculty ? b trained
Batch module details	report_monitor_get_batch_details()	Latest 100 coordinator

7. URL Filters & Parameters

Parameter	Example	Effect
centre_id	?centre_id=1	Filter all sta centre
report_month	?report_month=2026-06	Month filter category/ce
months	?months=12	Chart rang months (de

Example full URL:

https://nielitbhubaneswar.in/admin/report_monitor?centre_id=1&report_month=2026-06&months=12

Filter notes

- Centre filter uses centres.id joined to courses.centre_id (or courses.training_center name fallback)
- Monthly filter applies to registration dates and batch start/created dates depending on section
- Reset button clears all filters back to defaults

8. Course Category Groups

Categories are mapped in report_monitor_helper.php to match public Courses page groups:

- Skill Based (Long Term) Courses (> 500 hrs)
- Skill Based (Short Term) Courses (90-500 hrs)
- Short Term / Digital Competency Courses (<= 90 hrs)
- Internship Programs & Boot Camps
- Degree / Diploma / Postgraduate Courses
- NIELIT HQ Digital Literacy Courses (CCC / ECC / BCC / ACC)
- Govt/Corporate Training
- NSQF / Other Programs

Course category is read from courses.category or courses.course_type. O Level and CCC courses appear under their respective category groups set in Manage Courses.

9. Data Flow Diagram (Text)

PUBLIC REGISTRATION

student/register.php ? submit_registration.php
?
INSERT into students (+ student_enrollments if multi-course)

ADMIN OPERATIONS

admin/students.php ? approve, reject, assign batch
batch_module/admin/manage_batches.php ? create batches, assign students
admin/manage_courses.php ? course category, centre, status
admin/manage_faculty.php ? faculty records
?
All updates write to MySQL tables

REPORT MONITOR (READ ONLY)

admin/report_monitor.php
?
includes/report_monitor_helper.php runs SELECT queries
?
Displays KPIs, charts, and tables

10. Master Admin Sidebar Context

Report Monitor appears in the sidebar under "Admin Management (Master Admin Only)" section, alongside:

- Add Admin, Manage Admins, Reset Password
- Course Assignments
- QR Attendance Scanner, Attendance Reports
- Report Monitor ? this page
- OTP Logs, API Management

11. Production Verification SQL

Use these queries in phpMyAdmin to cross-check Report Monitor numbers:

Total applications (excluding rejected/inactive)

```
SELECT COUNT(DISTINCT s.id) AS total_applications
FROM students s
INNER JOIN courses c ON c.id = s.course_id
WHERE LOWER(COALESCE(s.status,'')) NOT IN ('rejected','inactive');
```

Pending applications

```
SELECT COUNT(DISTINCT s.id) AS pending
FROM students s
WHERE LOWER(COALESCE(s.status,'')) = 'pending';
```

Students in batches

```
SELECT COUNT(DISTINCT s.id) AS in_batch
FROM students s
WHERE LOWER(COALESCE(s.status,'')) NOT IN ('rejected','inactive')
AND ((s.batch_id IS NOT NULL AND s.batch_id > 0)
OR EXISTS (SELECT 1 FROM batch_students bs
WHERE bs.student_record_id = s.id OR bs.student_id = s.id));
```

Total batches

```
SELECT COUNT(*) AS total_batches FROM batches;
```

12. Troubleshooting

Issue	Likely cause / fix
Page not visible in menu	Login as master_admin, not course_coordinator
Access denied redirect	Role is not master_admin — check admin table role
Zero faculty data	No batch_faculty assignments — assign in Manage Batches
Zero batch data	batches table empty or batch module not set up
Numbers differ from Students page	Report excludes rejected; Students page may show rejected filter
Category shows Uncategorized	Set courses.category in Manage Courses / Edit Course

13. Summary Checklist

- Report Monitor = Master Admin only, read-only analytics
- Entry: Sidebar ? Report Monitor
- Main outbound link: batch_module/admin/manage_batches.php
- Data from: courses, students, batches, batch_students, centres, faculty, batch_faculty
- Rejected students are excluded from all application counts
- Filters: centre_id, report_month, months (URL parameters)
- Regenerate this PDF: php docs/generate_report_monitor_guide_pdf.php
